	min.	max.											
The use of One-ear clips is an economical solution for many simple hose assemblies, as they can be used with air or other fluids. The inner-ring means that the clamp fits snugly around the hose, while the beveled edges protect the hose from being pinched during fitting. Due to the AISI-304 steel used in the manufacture of these clips, their corrosion resistance is outstanding. These clips are especially recommended in outdoor and marine applications.	7,5	8,5	23012300	9,3	5,5	6,0	13,0	0,8	8,5	7,8	2000	16000	INOX
