

Stainless steel inner-rings for ASFA-S worm-drive hose clips

W4

Black Finish

Inner Rings for ASFA S clips W4

Information	Ø Application mm	Reference Black	Reference Plain	a ± 0,5	b	Box Quantity	Packing
This inner ring for ASFA-S worm-drive clip was designed to give extra protection to the hose, especially in applications where changes in the frequency of vibration can be an issue. The ring also contributes to an even distribution of pressure around the hose and confers a constant tension function to the clip. The black coating helps to ensure that the rings adapts correctly to the hose assembly.	16-27	73031218	03031210	16,5	0,25	100	400
